

PRINCIPLE	COMMITMENT	SYSTEM	INITIATIVE	PERFORMANCE
<b>Principle 9</b> Business should encourage the development and diffusion of environmentally-friendly technologies	Copagaz is fully committed to the use of clean technologies, within the standards of the LPG distribution industry in Brazil.	<b>Code of Conduct</b>	This document sets forth the Company's ethical and behavioral standards, consolidating and updating a wide set of principles, norms and procedures that has been respected since it was founded.	All employees must sign a formal commitment instrument, stating their awareness, agreement and adhesion to the Code of Conduct.
		<b>Sustainable Development</b>	Copagaz contributes to the improvement of the quality of life and the preservation of the environment, using technologies that promote the sustainable development and the respect for the environment.	
		<b>Ethical Conduct Committee</b>	Consisting of the managers from the Human Resources, Auditing and Legal areas, its goal is to centralize the issues raised by employees, customers and suppliers.	
<b>Industrial Waste Destination Program</b>	A comprehensive set of initiatives beyond legal obligations, the Industrial Waste Destination Program is being implemented in all of Copagaz's branches with a view to making the Company's operations environmentally safer.	The Program includes the following initiatives: <ul style="list-style-type: none"> <li>• Selective garbage collection</li> <li>• Selective industrial waste collection</li> <li>• Registration with IBAMA</li> <li>• Securing of environmental licences</li> <li>• Authorization for digging artesian wells</li> <li>• Replacement of painting systems with cleaner technology</li> <li>• Decontamination of canisters</li> <li>• Drilling of shafts for monitoring the soil</li> <li>• Installation of containment boxes and basins</li> <li>• Other initiatives</li> </ul>
